Why create a website with us
- - - - - X

- We believe business success starts with great a website and since we understand its value, we care for your business growth by providing the best possible solution that will work for you.

- Starting with our process to the quality of work delivered, we are professional in our approach and we deliver professional results.

- We care enough to suggest to you what will work best for your requirement.

- Our presence in the industry will ensure that we will always be available for your website needs, updates, maintenance, and redesign.

- We take responsibility for our client's growth through the web and our support stands by it.

- We offer various solutions that will cater to your need.

Responsive Web-Design Solutions

- - - - ✗

Our experts understand this well and deliver responsive lightweight web-design solutions that are specific to their purpose. One can choose a mobile-specific design layout or a responsive web design that fits all devices.

Since responsive web design is considered a best practice on the internet we offer this for all our new web-design solutions by default. But if you happen to have a website that was developed without a responsive layout, we will help you in converting the same to a responsive web design.

CMS Web-Design Solutions

– – – – X

Ever since the dawn of the internet to date, websites have been the most effective marketing tool and on these websites, the one thing, that ensures your target traffic is driven towards you and enables you to conduct business is the content. The content is the king.

A content management system is required to have evergreen, updated, and apt content on your website. We at Bumble Bees, prefer in utilising the features of the WordPress backend system, thus offering CMS websites on WordPress with the latest trend, technology, and security.

## Moreover, we take care of the following
- - - - - - - - - - - - - - - - - - - X

- Retaining your web originality of the website.

- Maintain your website and hosting by updating the core, ensuring uptime and security.

- Provide immediate assistance for restoration in case of any issues.

- Provide support on minor updates and fixes.

- Keep your on-page details updated.

- Timely updates and reminders for your domain and hosting.

- Support for your hosting server, mail servers, and analytics.
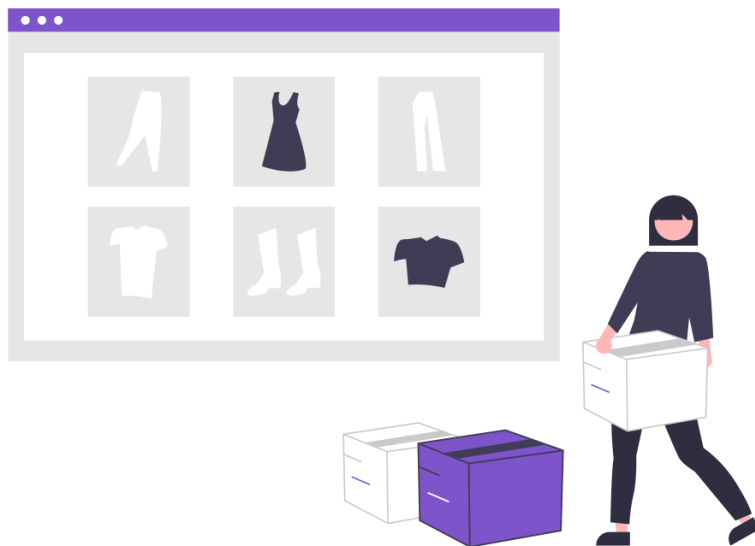

- Overall proactive support.

We even offer advanced web maintenance packages which cover generic website maintenance, digital marketing support, and social media assistance.

E-Commerce web solutions
- - - - X
